

SPECIAL MACHINES – Performance Materials

PROJECT PROFILE

Industry: Performance Materials

Image:

Description:

Large (50 ton) special machine for forming of product from Performance Material.

Services Provided:

- Design/Engineering
- Manufacture
- Installation
- Training

Major Equipment Provided:

- Complex machining of large cast iron components
- Specially designed and built high speed rotary indexer
- Precision electro-mechanical and hydraulic motion.

Highlights:

- Engineering modifications to existing design for increased speed and larger capacity – including control.
- Short project duration – 10 months – from order receipt to shipment.
