

Contract Manufacturing

Global Supplier of Engineering and Manufacturing Services

About Us

Keller's Contract Manufacturing Program provides world-class contract manufacturing solutions for low to medium production volumes of complex electromechanical assemblies, high-level assemblies, and fully integrated machines, systems, and instruments.

Our highly refined project management system, coupled with extensive capabilities and experience, ensures the success of your contract manufacturing program.

Whether you have exceeded your in-house capacity, require value-added services, or your strategic plans call for outsourcing—Keller can help.
